**Welcome and Introductions**

**Presentations**

**Andrew Brix, Ann Arbor Energy Office – Ann Arbor Solar Cities Program**

Highlights and activities related to the Ann Arbor Solar Cities Program will be presented.

**Dan Radomski, NEXTENERGY - Michigan's Solar Energy Industry Value Chain**

- What does the Solar Value Chain look like?
- What is the current state of Michigan's solar value chain?
- Where do we have strengths, weaknesses, opportunities?
- Where do we go from here? How do we capitalize on opportunities?

**Jill Babcock, MEDC - Solar Energy Industry Policy and Program Activities**

This presentation will cover MEDC policy and programmatic activities in place to encourage solar PV manufacturing in Michigan.

**Financial Benefits of PV Systems for Residential Customers and Their Utility Company**

**Robert G. Pratt, PE – President, RGP Pro, Inc.**

This presentation takes a look at the potential financial benefits of operating a residential PV system over four Southeast Michigan seasons. Savings are calculated and evaluated for both the customers' monthly bill reductions and the reduced costs of utility energy purchases and delivery. The study looks at sell-back, no sell-back and true net metering cases.

**Michigan Renewable Energy Legislation Summary**

**Julie Baldwin and Tom Stanton (MPSC)**

The MPSC Staff will present a summary of the three bills recently passed by the Michigan Legislature related to renewable energy, energy efficiency and utility plant construction.

**Commissioner Monica Martinez - Closing Remarks**
